# Generators | Product Range

# Doosan Portable Power

## Performance you can trust

Our complete new line of generators, ranging from 20 to 500 kVA prime power, deliver performance you can trust to provide power in critical applications. They offer innovative features that [simplify operation](#), [enhance serviceability](#), [reduce downtime](#) and promote [environmental friendliness](#). Their reliability, combined with our dedicated professional service support, make them the best choice for demanding applications.

### Controls & Connections easy to use

All controls and power connections are grouped together at the rear of the unit for enhanced [safety](#) and [convenience](#). The control panel is easy to use, allows a high degree of customisation, lets users manage output and offers many other functions for optimal performance.

### Extended Runtime

The combination of a [high-capacity fuel tank](#) and [low fuel consumption](#) enables our generators to run at least 24 hours without refuelling, ensuring uninterrupted power for your critical applications and [reducing operating costs](#).

# Your journey with a **Doosan** Portable Power generator starts here

With Doosan Portable Power, you are not just buying a piece of equipment. You are investing in the strength and expertise of Doosan Portable Power and its people. From engineers and factory technicians, to field representatives and your dealer, we support your purchase. We are committed to helping you realize maximum value job after job, day after day. Wherever you see a piece of Doosan Portable Power equipment, you'll know that all of Doosan Portable Power team is behind it.

Our industry-leading support system will keep you up and running for as long as you own your Doosan Portable Power equipment. Doosan Portable Power is committed to supporting each product throughout its life. We are committed to offer you an invaluable source of product information, financial service, training, technical service bulletins, service, parts and more...

[www.doosanportablepower.com](http://www.doosanportablepower.com)

**More than generators**

## Warranty

We protect your purchase or lease with a 1 year or 2000 hours warranty (whichever occurs first) on the entire generator package, 2 years or 4000 hours on the alternator as well as 2 years or 4000 hours on Mitsubishi and John Deere engines (G20 to G100) and 2 years or 2000 hours on Cummins engines (G250 to G500).

## Aftermarket solutions and service

- Dealer stocking program for frequently used parts
- Express availability for other parts
- Support for you and your dealer with diagnostic expertise on difficult service problems

## Financial solutions

We provide financing and leasing options tailored to meet your individual business needs. Our streamlined loan application and credit approval process can quickly make your business plans a reality.

## Remarketing services

We help our customers to sell and buy used equipment by providing them a direct online connection to a large inventory of previously-owned equipment, anywhere in the world.

### **Compact size / Easy accessibility**

Our generators are compact and designed to run [quietly](#), maximising performance while powering a full load in high temperature conditions. They are among the [lightest and most compact](#) generators in the industry, reducing logistic and transport costs. Furthermore, their large doors provide easy accessibility and [facilitate serviceability](#) without compromising the compactness.

### **Easy to handle**

All models feature forklift pockets and lifting hooks that allow you to place the generator where you want it - [easily, quickly and safely](#).

### **Environmentally friendly**

Each model features [110% containment capacity](#) to prevent any spillage of fuel, oil or coolant onto the ground. In addition, all models will progressively be modified to meet [EU Stage IIIA](#) emission regulation. They deliver high output at low sound levels thanks to their innovative enclosure with sound-reducing insulation, optimized fan speeds and critical grade exhaust components.

### **Reliable**

All units feature powerful alternators with [AREP](#) excitation which gives best in class motor-starting capability. They feature a heavy-gauge enclosure finished with a superior zinc rich primer and a durable powder final paint to provide the ultimate in corrosion resistance for long life and high resale values. Last but not least, [intensive endurance testing procedures](#) ensure that our generators are among the most [durable](#) and reliable on the market.
